

COMPUTERAIDEDDISPATCH

## What Is It?

INTERCad™ is EmergiTech's computer aided dispatch solution. Developed through years of experience meeting the needs of emergency communications centers, it is optimized to allow for quick and efficient call processing and decision-making.

## What Does it Do?

INTERCad™ offers special features to meet the unique needs of fire and EMS personnel. A flexible run card system allows fast unit recommendations, and gives communications personnel access to inspection information, hazards, utility shutoffs and knox boxes.

## How Can It Help Me?

INTERCad™ can help your fire and EMS staff quickly and effectively make decisions. A robust set of features help your agency to:

- Drag and drop calls for easy data manipulation
- Easily see important data with color-coded call and unit status
- Quickly retrieve call histories and response times
- Record times of activity with no manual data entry needed
- Unify staff with dispatch terminals that refresh simultaneously. All dispatchers see the same information at the same time
- Access inspection and hazards information
- Safeguard data through password security controls
- Print easy-to-read statistical reports
- Save dispatchers time by adding an optional ANI/ALI interface
- Run on single-user workstations or vast multi-user networks through flexible licensing options
- Continue to grow. There is no limit to the amount of data the system can organize, manage and store
- Enjoy the platform stability of Microsoft Windows®
