

E9-1-1

What Is It?

INTER911™ is EmergiTech's enhanced 9-1-1 call taker software. It is designed for use as a primary interface for emergency communicators at PSAPs.

What Does it Do?

INTER911™ helps you meet the changing needs of running a 9-1-1 operations center. Designed specifically for 9-1-1 communications professionals, the next generation-read system works as a freestanding application or may be integrated with the rest of our comprehensive product suite to provide a seamless public safety software environment.

How Can It Help Me?

INTER911™ boasts a user-friendly interface that is both intuitive and easy to learn. Use it to bridge the gap between E911 Call taker applications to CAD dispatch software. It helps you:

- Detect TDD and easily access response screens from each communicator's position
- Automatically time/date stamp all calls
- Playback or print stored TDD calls
- Set system to have as many one-touch transfer buttons as you need
- View a full featured on-screen dial pad pop up for easy manual call transfers
- Easily read ALI display screen with VCR control buttons for scanning call histories
- Password protect your set up and configuration screens
- Separate calls into ANI and ALI components for simple fault isolation
- Access manual or automatic ALI rebids
- See full alarm message indications from the ANI/ALI controller system
- Run on single-user workstations or vast multi-user networks through flexible licensing options
- Enjoy the platform stability of Microsoft Windows®
