

RECORDSMANAGEMENT

## What Is It?

INTERBADge™ is EmergiTech's law enforcement records management solution. Designed for the needs public safety professionals charged with tracking and reporting incident and investigational data, the software is a powerful records clearinghouse for the public safety agency of the twenty-first century.

## What Does it Do?

INTERBADge™ helps public safety professionals report, archive and analyze incident and investigational data. Use one system to track complaints, criminal charges, citations, traffic crash reports and case investigations.

## How Can It Help Me?

INTERBADge™ is the smart records management choice for the law enforcement agency of today. In addition to helping you track and organize massive amounts of data, it helps ease the burden of reporting, and integrates with other EmergiTech systems to ensure continuity of data. This solution allows you to:

- Record and track different types of data including events, criminal offenses, arrests, field interviews, missing persons, citations, accidents, gang affiliations, and home/business monitoring data from the confines of a single system
- Safeguard property and evidence by recording and tracking it electronically
- Manage staff with personnel management features
- Comply with NIBRS and other state/federal reporting requirements; while dramatically reducing the time associated with meeting these requirements
- Print statistical reports with ease
- Easily complete state incident and accident forms already included in program
- Streamline dispatch operations by integrating with EmergiTech's INTERCad™
- Access unlimited amounts of information through the system, eliminating the need to store and search volumes of physical paperwork
- Run on single-user workstations or multi-user networks through flexible licensing options
- Continue to grow. There is no limit to the amount of records the system can organize and store
- Enjoy the platform stability of Microsoft Windows®
