

## CIVILPROCESSING

### What Is It?

INTERCIVil™ is EmergiTech's Civil Processing solution. Created to meet the needs of sheriff's departments of clerks of court charged with civil service, it has features designed to save your agency time and money.

### What Does it Do?

INTERCIVil™ enables your civil division to follow a docket from the court, service attempts and final execution payments. The system provides form letters, reports and basic accounting features. From typical paper service through sheriff sales, INTERCIVil™ stands ready to record your activity.

### How Can It Help Me?

As a fully integrated software addition to INTERBADge™ or INTERSLam™ records and jail management systems, INTERCIVil™ works with these systems to reduce data entry redundancy and save you processing time. Created specifically for the needs of a civil service division, it has product features that can help you process and track civil matters with ease. The system allows users to:

- Easily track all civil service records from one system
- Record and track sheriff sales and profits
- Log and track successful service and service attempts
- Calculate service fees with an easy-to-use fee calculator
- Synchronize with INTERBADge™, INTERCad™ or INTERSLam™ Master Name File, integrating large amounts of data
- Retrieve information quickly for statistical reporting. Users can track and print large amounts of data in an easy-to-use format
- Protect your data from unauthorized access by using robust security controls
- Access unlimited amounts of information through the system, eliminating the need to store and search volumes of physical paperwork
- Run on single-user workstations or vast multi-user networks through flexible licensing options
- Continue to grow. There is no limit to the amount of records the system can organize and store
- Enjoy the platform stability of Microsoft Windows®
