

RECORDSMANAGEMENT

## What Is It?

INTERFire™ is EmergiTech's fire records management solution. Created specifically to address the needs of the fire service, this product is loaded with features to manage the increasingly complex data you're tasked with tracking.

## What Does it Do?

INTERFire™ helps fire professionals collect, report and analyze increasingly complex incident and investigational data. Use this one system to track personnel, equipment maintenance records, hydrants and SCBA.

## How Can It Help Me?

INTERFire™ manages massive amounts of data and makes it available at users' fingertips. Use the system to quickly and easily handle:

- Electronic NFIRS reporting
- Printing of NFIRS 902G reports
- Tracking of unit response times
- Incident and supplemental narratives
- Record exposures and injuries
- Store digital images
- Manage inventory
- Address staffing needs and manage personnel
- Complete company officer and shift supervisor daily logs
- Hose management
- SCBA maintenance
- Inspection and prevention records and tracking
- Data protection. System is password protected from unauthorized access
- Increased growth. There is no limit to the amount of records the system can organize and store
- Enjoy the platform stability of Microsoft Windows™
