

## MOBILEDATA

### What Is It?

INTERMOBILE Fire/EMS™ is an extension of INTERCad™ computer aided dispatch software that is designed specifically to address the mobile data needs of fire and EMS services. Developed with the cooperation of several fire and EMS agencies, it is a powerful tool to manage apparatus and pre-arrival data.

### What Does it Do?

The software combines the best features of INTERCad™ dispatch software with useful tools specifically for the fire and EMS service in the field. Large buttons for easy operation in the apparatus and the comprehensive display of pre-arrival information helps to equip first responders with information that helps save lives and property.

### How Can It Help Me?

INTERMOBILE Fire/EMS™ helps keep personnel safe by giving them increased situational awareness in the field. Use this comprehensive solution to:

- Manage alerts
- Enter comments
- Track hydrant information
- Complete pre-plans
- Store inspection records
- View location history
- Conduct fire investigations
- Record patient incidents
- Quickly find local ER status updates
- Chat with dispatchers or other units
- View map data
- Protect data from unauthorized access through password protection
- Enjoy the platform stability of Microsoft Windows®
