

## JAILMANAGEMENT

### What Is It?

INTERSLam™ is EmergiTech's comprehensive jail management solution. It is a highly configurable product that allows the software to adapt to an agency's existing workflows, saving you time and money.

### What Does it Do?

INTERSLam™ tracks inmate and administrative activity from booking to release. It records disciplinary information; inmate property records, medical information, and even calculates release dates. The system is truly a one-stop shop for managing a jail facility.

### How Can It Help Me?

Jail management involves a complex series of tasks. INTERBADge™ helps an administrator keep track of all facets of these tasks in a single easy-to-use system. It can help you:

- Track inmate property via bar coding system
- Assign inmates with cell placement module
- Review medical histories and inmate prescription information
- Manage inmate visitor lists
- Calculate release dates with automatic sentence computation
- Complete the booking process with configurable questionnaires including medical screening, communicable disease risk assessment, risk classification and prior history
- Store mug shot images, aliases and gang information
- Define unique codes for offenses, reasons for holding and release
- Easily produce reports for state, local and federal reporting requirements
- Track inmate commissary and work release data
- Update court information including sentencing, bond information, continuances and next court date for inmates
- Run on single-user workstations or vast multi-user networks through flexible licensing options
- Continue to grow. There is no limit to the amount of data the system can organize and store
- Enjoy the platform stability of Microsoft Windows®
